**DETAILED ACTION**

***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 16-17, 19-22, drawn to a method for screening for agents that modulate IgE production, classified in class 435, subclass 7.8.
- II. Claims 18, 29-33, drawn to a method for screening for agents that modulate IgE production wherein the cell comprises a fusion protein, classified in class 435, subclass 7.71.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are independent and distinct, each from the other, because the methods are practiced with materially different starting materials, have materially different process steps, and are for materially different purposes. In the instant case, the method of invention I uses cells naturally expressing IgE, while the method of invention II uses cells expressing a fusion protein, thus the starting materials are different. Further, the process steps are different because in the method of invention II the cells must be transfected with a nucleic acid expressing the fusion protein, while this step is not necessary in invention I. The methods are for different purposes because the method of invention I will identify agents which modulate IgE production, while the method of invention II will identify agents which modulate the function of a fusion protein.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Art Unit: 1646

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
